RELEVANT EXPERIENCE | PROJECT

Yoke-Chat Room App | Back End Developer |
Deployed Link: https://thawing-cove-95020.herokuapp.com/ |
GitHub Link: https://github.com/vina19/Yoke2
Yoke is an online messaging tool, that allows users to join/add a chatroom and have real time conversations with other users online.
- **Role:** Used MySQL database to GET and POST the username and the room data for the chat.
- **Utilized:** Handlebars, CSS, Bootstrap, JavaScript, Node.Js, MySQL, Express, Socket.IO, and HTTP GET POST requests.

Weather Dashboard App | Full Stack Developer |
Deployed Link: https://vina19.github.io/Server-Side_APIs-Weather_Dashboard/ |
GitHub Link: https://github.com/vina19/Server-Side_APIs-Weather_Dashboard.git
A simple weather dashboard where the user can see the current weather information and five days forecast weather from the city that the user put in the search bar.
- **Role:** Created HTML page styled with CSS to add search queried weather list with bootstrap effects. Used jQuery AJAX method to make requests to server-side APIs. Worked on integrating OpenWeatherMap API and manipulated the DOM using JavaScript leveraging the DOM API.
- **Utilized:** HTML, CSS, Bootstrap, JavaScript, jQuery, AJAX, Moment.js, and Server-side APIs.

Matcht App | Back End Developer |
Deployed Link: https://matchtapp.herokuapp.com/ |
GitHub Link: https://github.com/vina19/matcht2
Matcht is a job search tool that allows users to browse job opportunities based on their location and save to their profile so they can go back and apply for the jobs they are interested in. Swiping left on a job opportunity will remove it from the available jobs list, swiping right will save the job to their profile.
- **Role:** Worked on setting up the database for the jobs data and user data. Worked on the search bar to search for a job by its location and worked on getting the swiping job card to the right work to save the job to the user database.
- **Utilized:** MERN Stack, Mongoose, JSX, Firebase, and React-tinder-card NPM package.
